DEAR CONSUMER
GREAT APPRECIATION FOR PURCHASING OUR PRODUCT
TO ENSURE THE BEST PERFORMANCE AND THE HIGHEST SAFETY, PLEASE
READ THE FOLLOWING EXPLANATION CAREFULLY
PLEASE READ THIS MANUAL WITH SUFFICIENT CAREFULNESS AND
PATIENCE PRECEDE THE CONNECTION AND INSTALLATION
Dear Subscriber,

**Congratulations** for choosing the digital service from IN Digital. Now, you can take total control of your entertainment and avail of the best that digital television has to offer.

In our continuing commitment to you, our valuable subscriber, we present the digital Set Top Box (STB) - your gateway to a whole new world of high quality pictures and sounds on your television. The STB also comes with an in-built electronic program guide and an all-new remote control to make for the best possible viewing experience.

The IN Digital service brings to you everything from program schedules /synopsis to 24/7 customer support at your fingertips.

Welcome to the digital experience

SAFETY INSTRUCTION

IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. The parameter of the using power source should be accordance with which indicating on the rear panel, otherwise the machine will work improperly and even be ruined.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. To prolong the useful life of this machine, the interval of the continuous switch action must be above one minute.
13. Use only the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
14. Unplug this apparatus during lightning storms or when unused for long periods of time.
15. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
16. Warning: This unit should only be serviced by an authorized and properly trained technician. Opening the cover or other attempts by the user to service this unit may result in serious injury or death from electrical shock, and may increase the risk of fire.
17. The MAINS plug or an appliance coupler of the apparatus is used as the disconnect device, the disconnect device shall remain readily operable.
18. The signal cable must be earthed to the system.
19. No naked flame sources, such as lighted candles, should be placed on the apparatus.

Note: All the OSD and illustrations in this manual may be somewhat different from the actual situation. Please take the actual RECEIVER as the standard.

WARNING: To reduce the risk of fire or electric shock, do not expose this product to rain or moisture. Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.

Refer to the identification/rating label located on the back panel of your product for its proper operating voltage.

This symbol indicates “dangerous voltage” inside the product that present a risk of electric shock or personal injury.

This symbol indicates important instructions accompanying the product.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

TO REDUCE THE RISK OF ELECTRIC SHOCK
DO NOT REMOVE COVER (OR BACK)
NO USER SERVICEABLE PARTS INSIDE
REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.
FRONT PANEL

1. MENU. menu entry/ menu goes back
2. Status indicator/ remote sensor/ displaying panel
3. Channel up or down/ cursor movement
4. Volume decrement/ operation confirmation
5. Volume increment/ menu goes back
6. The spot where opens the lid to insert a smart card

REAR PANEL

1. Terminal, antenna signal insert
2. Terminal, antenna signal loop out
3. Terminal, coaxial digital audio signal output
4. Terminal, video signal output
5. Terminal, audio signal output, R
6. Terminal, audio signal output, L
7. Power switch
8. Plughole, power cord
It's recommended to operate each function of the keys on the **Receiver** by using the key on the remote controller. Please read this section to lend itself to advance your understanding of the function of the **Receiver**

**PRECAUTIONS ABOUT BATTERIES**

Improper use of batteries may cause corrosion or fluid leakage. Please observe the following instructions for the safe use of batteries

1. Do not mistake the polarities of batteries
2. Never leave dead batteries in the remote control
3. Remove batteries from the remote controller it is not going to be used for a certain time
4. Do not attempt to disassemble, short-circuit, heat, recharge or throw the batteries into the fire source
5. Do not use new batteries and old one together, or which is different type
6. Wipe away any electrolyte fluid inside the remote controller, and insert new batteries
PREPARATION OF REMOTE CONTROL

Load the batteries to the groove of the remote control and then enable you to operate the native

1. Open the lid
2. Load the batteries (AAA type) and attend whether the anode and cathode of battery are corresponding to the polarity indicated on the remote controller
3. Close the lid

OPERATION SCOPE OF THE REMOTE CONTROLLER

Make the controller toward the inductive window of native and then press the keys

- Distance: about seven meters in front of the inductive window
- Angle: about 30 degree right or left refer to the frontispiece of the native’s front panel

USEFUL PROMPTING

- To prolong the useful life of this machine, the interval of the continuous switch action must be above one minute
- The parameter of the using power source should be accordance with which indicating on the rear panel, otherwise the machine will work improperly and even be ruined
- When the picture that the unexpected non-respondency happening, please turn on the machine again
- To maintain the suitable antenna installation position, the proper antenna installation angle, the adequate antenna earthing, the normal antenna anti-interference measure. Keep the earthing of the outdoor antenna separating with the indoor equipment’s
» connect the audio and video output terminals with the corresponding input terminal on a TV set
» Insert the digital antenna cable into the [CABLE IN] terminal on the rear panel, please notice that the connection effect should effectual
» The [CABLE OUT] loop out terminal can form the loop connection with another receiver, can also be linked with the RF IN input on a TV set to provide RF signal.
» Don't bundle the antenna cable with a power cord in case cause interference
» The terminal [COAXIAL] can connect with a coaxial input on an amplifier

1. Insert the digital antenna cable into the [CABLE IN] terminal on the rear panel of the receiver
2. Connect one end of yellow terminal on a RCA cable to the VIDEO output on this receiver and the other end to the VIDEO input on a TV set
3. Connect one end of red terminal on a RCA cable to the AUDIO R output on this receiver and the other end to the AUDIO R input on a TV set; Connect one end of white terminal on a RCA cable to the AUDIO L output on this receiver and the other end to the AUDIO L input on a TV set

3. Plug the connector of power cord into a socket and turn on the receiver and TV set.
STARTING UP

1. Plug the connector of power cord into a socket, turn on the power switches of this receiver and a TV set, the receiver enters into its normal mode.
2. Render the remote towards the inductive panel of the receiver to instruct the machine into its standby mode, re-press the key, restore it to its normal watching state.
3. Once the signal has been locked, the signal indicator lights up.

THE FIRST TIME USING THIS RECEIVER

The first time using the receiver, the screen appears a dialog box, [No valid program to be played, start auto searching now?].

Use the OK instruction to start automatic searching.

After searching, the receiver returns to its program-watching state.

Press the UP/DOWN key to turn channel and the LEFT/RIGHT key to adjust volume.
CHANNEL MANAGER

On Main Menu, highlight the Channel Manager.

Press the OK key to enter. >Auto Search. Highlight [Auto Search], press the OK key to get into its next menu. Press the BACK key to go back.

Press the OK key to start searching automatically.

After searching, the screen goes back to its program-watching status. Press the UP/DOWN key to turn channel and the LEFT/RIGHT key to adjust volume.
Manual Search. Highlight [Manual Search], press the OK key to get into its next menu.

>>Frequency, Symbol Rate. Press the digit-key to input concrete value.
>>Modulation. Press the LEFT/RIGHT key to alternate an option.

As for the accurate value, please refer to the local program provider.

Press the red key to start single Frequency search, press green key to start auto search

After searching, the screen goes back to its program-watching status. Press the UP/DOWN key to turn channel and the LEFT/RIGHT key to adjust volume.
Tuner:

- Input Frequency: 51-862MHz
- Input level: 45dBuV-90dBuV(75Ω)
- Frequency band: 8 MHz
- Symbol rate: 6.900MBaud
- Demodulation type: 16, 32, 64, 128, 256 QAM adjustable
- Input impedance: 75Ω

Video:

- Decode format: MPEG2.MP@ML
- Output system: PAL, NTSC
- Output terminal: RCA
- Picture definition: 720×576（PAL）
- Video output range: 700±70mVpp

Audio:

- Decode format: MPEG2（Layer 1，2）
- Frequency respondence: 20Hz-20KHz
- Sampling frequency: 32/44.1/48KHz
- Output terminal: RCA, COAXIAL
- Output level: adjustable（600Ω unbalance）

Power:

- Voltage: 90-270V ~ 50/60 Hz
- Consumption: 10W or so

Environment:

- Temperature: 5℃ - 40℃
- Mass: 2.0kg or so
CERTIFICATE OF WARRANTY

This certificate of warranty should be produced for servicing under the terms of the warranty.

CONDITIONS OF WARRANTY

1) Within one year from the date of purchase, if any component(s) is found to be defective due to faulty workmanship or defective material, repairs will be executed free of charge and the defective part replaced.

Parts repaired or replaced are under warranty throughout the remainder of the original warranty period only. Repairs under warranty may also be carried only by authorized service centres or the authorized local cable operator.

2) This warranty does not cover any form of damage resulting from accident, misuse, application of incorrect voltage or any use contrary to the operating instruction supplied along with the equipment.

3) No responsibility will be accepted for damage arising out of unauthorized modification or alterations of any nature made to the Digital Set Top Box.

4) No responsibility will be accepted for damage or loss incurred during transit of Digital Set Top Box.

5) This warranty is not valid if the serial number of the Digital Set Top Box has been deleted, defaced or altered.

6) This certificate of warranty should accompany the Digital Set Top Box if service under warranty period is required to be carried out at the authorized service centres.

7) The STB conforms functionally to the appropriate BIS standards.
